

Heights – Connect the Hardware

Connect the Hardware

- ① Place your BeHub router near your Internet-connected modem.
- ② Connect the LAN cable to your modem and to the port labeled WAN on the router.
- ③ Connect the supplied power adapter to the router and a power outlet.
- ④ Turn on the router by pressing the power button and wait approximately one minute until the router finishes the initial startup.
- ⑤ When the LED light on the front of the device turns white, the router is connected to the internet and you can start using the internet.

* The default WiFi network name and password appear on the label on the back of the device.
